

ISACA Advanced
in AI Audit.

Lead the Next Stage of the Digital Age.

ELEVATE YOUR SKILLS AND CREDIBILITY IN AI AUDITING.

From the global leader in IT Audit, ISACA Advanced in AI Audit™ (AAIA™) is designed for CISA®, CIA and CPA holders with IT audit or IT advisory experience who want to demonstrate their skill in AI audit.

Validate your capabilities with the first AI credential built specifically for a new era of IT audit.

From the creators of the globally recognized CISA® certification, the ISACA Advanced in AI Audit (AAIA) certification empowers audit professionals to recognize, assess and respond to AI risks, opportunities and impacts—while also using AI to enhance audit workflows and deliver deeper insights.

Passing the AAIA exam and earning certification demonstrates the ability to audit AI-driven systems, including large language models, machine learning, intelligent automation tools and data-driven decision engines. You'll be uniquely recognized to advise stakeholders on the adoption of AI and harness AI across key practice areas, including:

1 AI Governance and Risk—effectively respond to risk in automated and data-driven environments.

Demonstrates your ability to advise stakeholders on implementing AI solutions through appropriate and effective policy, risk controls, data governance and ethical standards.

2 AI Operations and Change Management—assess AI systems in alignment to strategic business goals.

Confirms your skill in balancing sustainability, operational readiness, and the risk profile with the benefits and innovation AI promises to support enterprise-wide adoption of this powerful technology.

3 AI Audit Techniques and Tools—optimizing audit outcomes through innovation.

Highlights your knowledge of audit techniques tailored to AI systems and the use of AI-enabled tools to streamline audit efficiency and provide faster, quality insight.

An advanced audit credential for professionals who meet these standards:

- Active CISA, CPA or CIA certification
- IT audit or advisory experience
- Some technical experience with AI systems
- Successful completion of the AAIA exam

TR - TOP RIGHT FOLIO

Bring trust and insight to a world shaped by artificial intelligence.

AI is no longer on the horizon. Organizations are embedding AI into the core of business operations, decision-making and automation. As these systems grow more complex and influential, audit professionals must evolve to ensure they are governed effectively, aligned to strategic goals, and ethically sound. Without specialized AI audit capabilities, organizations risk falling behind in both compliance and innovation.

ISACA's AAIA certification bridges this critical skills gap by equipping credentialed auditors with the ability to audit machine learning models, intelligent automation tools, and data-driven decision systems. More than just oversight, AAIA prepares you to use AI to enhance the audit process itself.

Upon certification, successful candidates will be able to:

- Implement AI-driven audit processes
- Use AI to optimize audit processes
- Respond to risk and improve oversight
- Audit data-driven environments
- Deliver assurance across the AI lifecycle design
- Help implement AI to align with strategic stakeholder goals
