

**Certified Data Privacy
Solutions Engineer™**

An ISACA® Certification

When Privacy Counts, CDPSE Matters

There is a gap in the industry today for skilled, experienced IT privacy technologists. Privacy requirements are changing rapidly across the globe, and organizations need to implement privacy requirements into their existing and future systems, networks and applications. ISACA's Certified Data Privacy Solutions Engineer certification addresses this need.

Why CDPSE for Your Team?

- CDPSE gives you the assurance that certification holders have the requisite experience and expertise.
- CDPSE holders are equipped to implement privacy by design into new and existing technologies and platforms.
- It complements certification holders' regulatory and compliance knowledge with in-depth technical know-how and experience.
- CDPSE is backed by the credibility that ISACA certifications confer on certification holders.

In short, CDPSE holders can boost your organization's reputation and increase customer retention. **Learn more at www.isaca.org/CDPSE.**

MOST COMMON PRIVACY FAILURES

64%

Lack of training
or poor training

53%

Failure to perform
a risk analysis

50%

Bad or nonexistent
detection of personal
information

INADEQUATE PRIVACY BUDGETS

49%

of respondents said
they had inadequate
privacy budgets

34%

said their privacy
budgets are
adequately funded

BIGGEST PRIVACY SKILLS GAPS:

- 1 Experience with different types of technologies and applications **60%**
- 2 Understanding the laws and regulations to which the organization is subject **51%**
- 3 Experience with frameworks or controls **50%**
- 4 Business insight **45%**
- 5 Technical expertise **44%**
- 6 Soft skills (e.g., communication, leadership) **36%**

The above findings are from a 2021 survey conducted by ISACA, and also show that technical privacy teams appear to be more understaffed than legal/compliance teams, and technical privacy positions often take longer to fill than legal/compliance positions.*
